

Priority's PayRight healthcare suite delivers tools that optimize payment acceptance for healthcare providers and offers patients many ways to pay for services. Whether upfront or after the visit, one-time or overtime, in person or online, our HIPAA and PCI-DSS compliant technology get providers paid faster and keep information safe and secure. PayRight includes everything needed to let patients pay how they want with the payment modality they prefer.

## PAYMENT MANAGER

---

Payment Manager is the hub for all things payment. From the front desk, back office, or even remotely, use it to take co-pays at the point-of-service, vault payment account preferences, keep pre-authorizations on file, create recurring or installment billing plans, track payment history, manage communications and more.

## PAYMENT SYNC

---

Integration Engine syncs patient demographics and payment information with virtually any medical, dental, or allied health practice electronic health records (EHR) or practice management system (PMS). Use Integration Engine to automate payment posting without costly IT projects or HL7 requirements and reduce manual resources needed to process, track and research payments.

## ePAY PATIENT PORTAL

---

ePay is perfect for practices that want to offer patients convenient, contactless online, and mobile payment options. With our HIPAA-compliant account messaging system and access to historical payment records built-in, use ePay to create a single access point to proactively communicate with patients and handle all of their billing needs and inquiries.

## WHITE-GLOVE ACTIVATION SERVICE

---

Our Concierge service means you don't have to be an expert at healthcare payments or payment technology. Just send us a setup request. We do the rest including full implementation, training, and activation, plus keep you updated throughout the process.
