# AnywhereCommerce Walker C2X Setup Guide

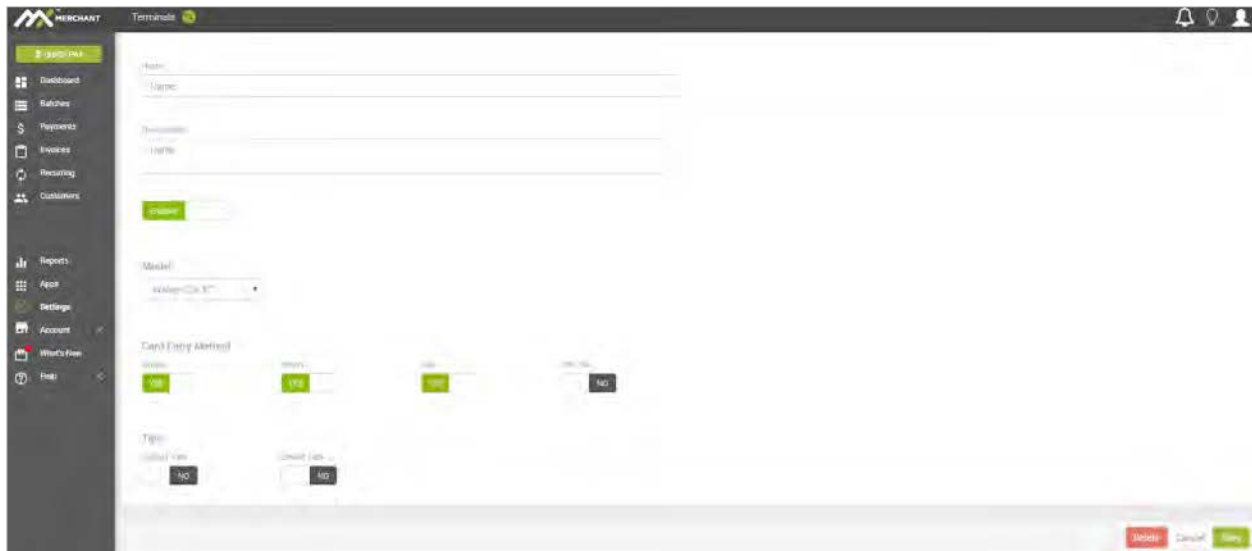

## Wired Reader Setup

---

Plug the reader directly into the computer using the USB cable provided.

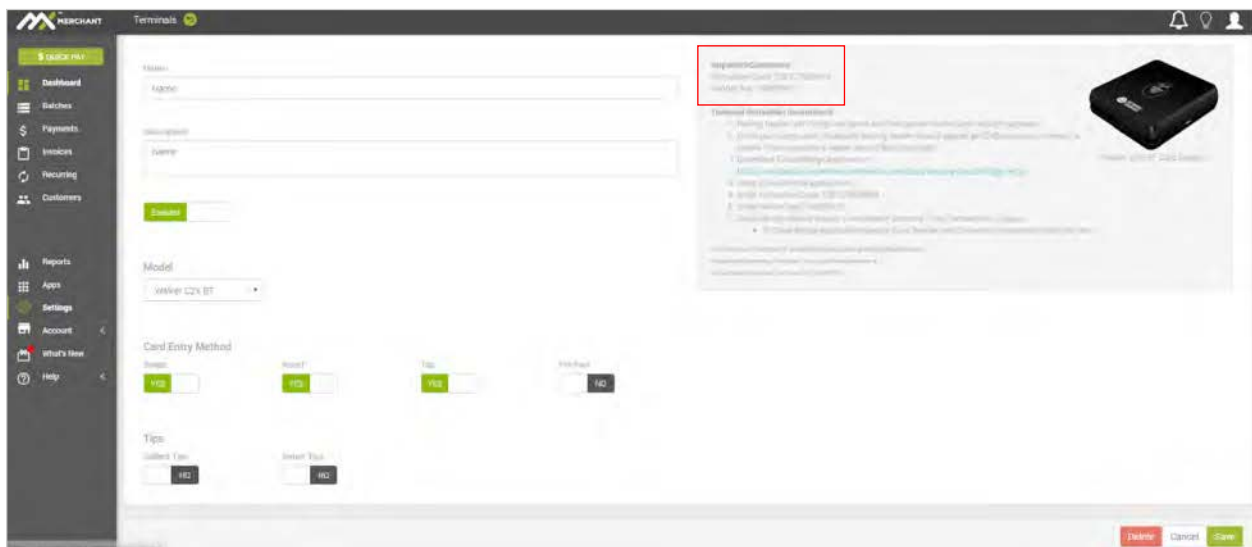

# Generating Activation Code

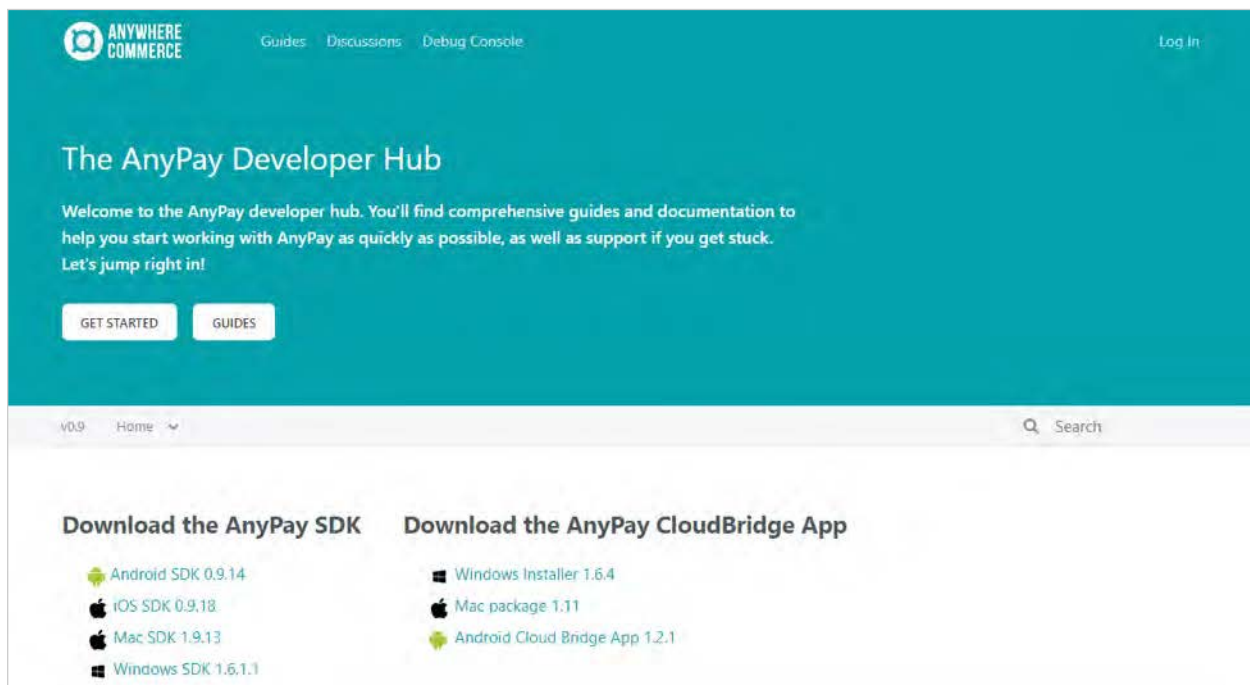

Within MX™ Merchant follow the user path:

**Settings > Terminal > Add Terminal > Add Name > Add Description**  
 (enter the name and description of your choice) > **Model – Walker C2X BT > Save**

After saving the terminal, you will see the **activation key** and **vendor/merchant key** towards the right of the screen which you will need for the next step.

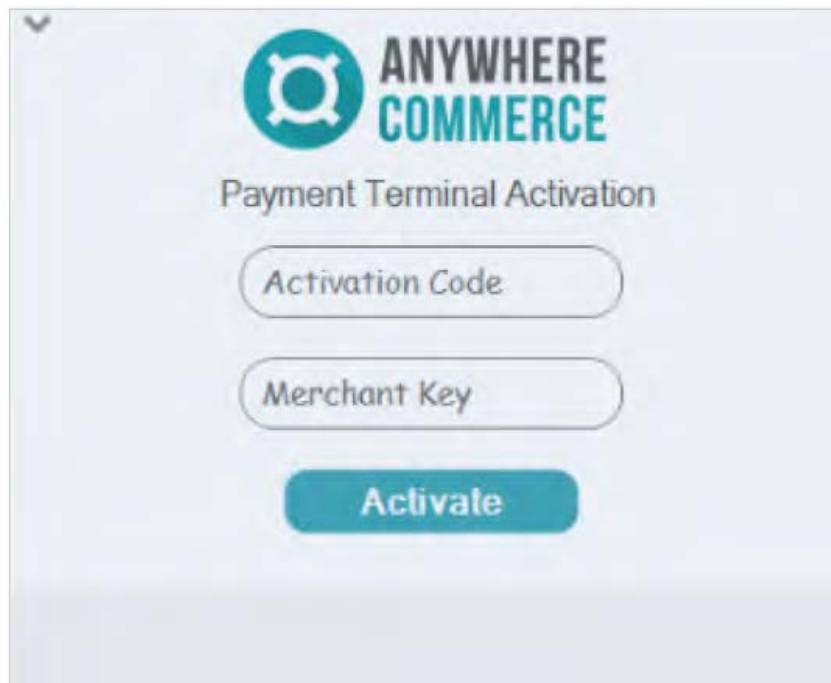

# Downloading Anywhere Commerce CloudBridge

Go to <https://anypaydoc.anywherecommerce.com/>

**Download the CloudBridge App** – Select the one that applies to the computer you are using. Once the download is complete, locate the application file and complete the installation.

# Activating Anywhere Commerce CloudBridge *(cont.)*

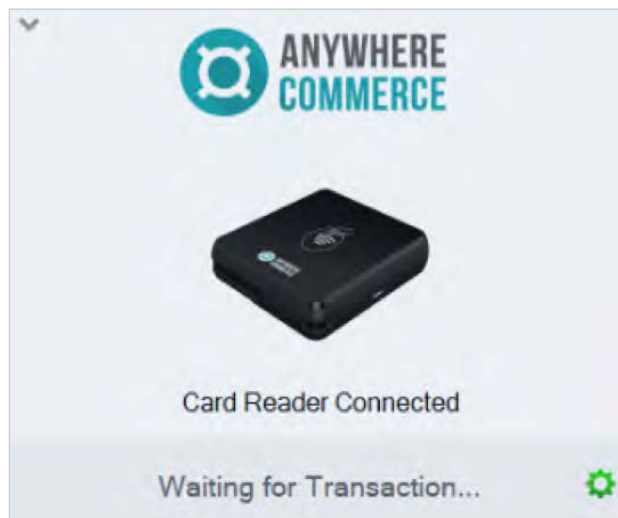

Once the installation has been completed, locate and open the **CloudBridge App**.

You will be prompted to enter an **Activation Code** and **Vendor/Merchant key**, this will be obtained from MX™ Merchant via the following user path:  
**Settings > Terminals > Select terminal that was just added**

# Activating Anywhere Commerce CloudBridge *(cont.)*

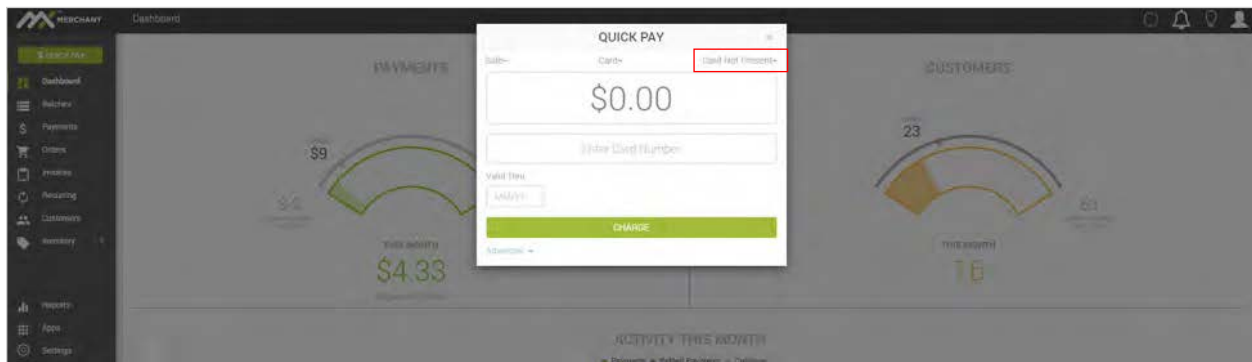

After activation code is entered, the CloudBridge app will display **Connect**.  
Select **Connect** to proceed.

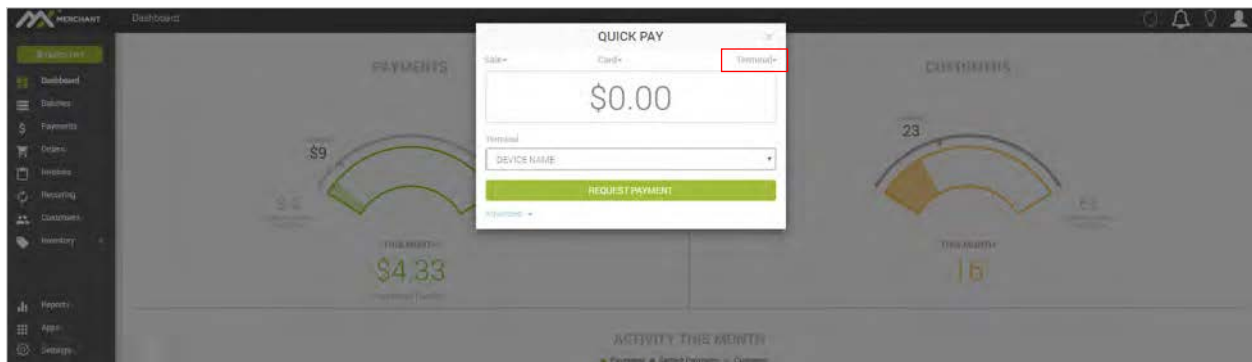

The reader will now be ready for use and will display, **"Waiting for Transaction..."**

# Running a Transaction

To run a transaction using the reader, follow the user path:  
**QuickPay > Click the drop-down that displays Card Not Present and select Terminal.**

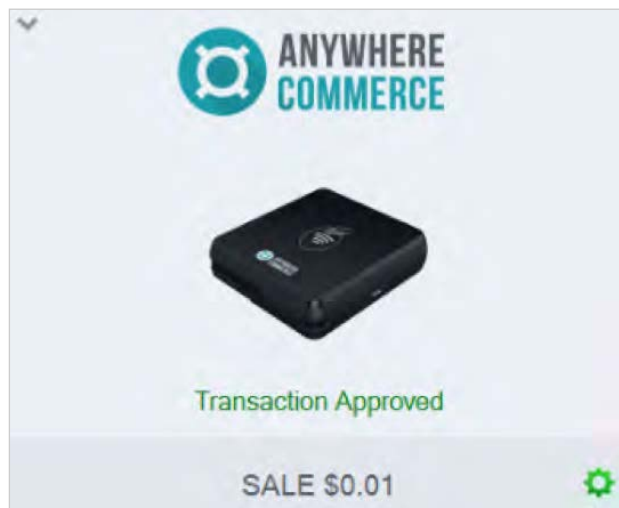

A second drop-down will appear and is labeled, **“Terminal”** and the terminal name created can be selected from there.

## Running a Transaction *(cont.)*

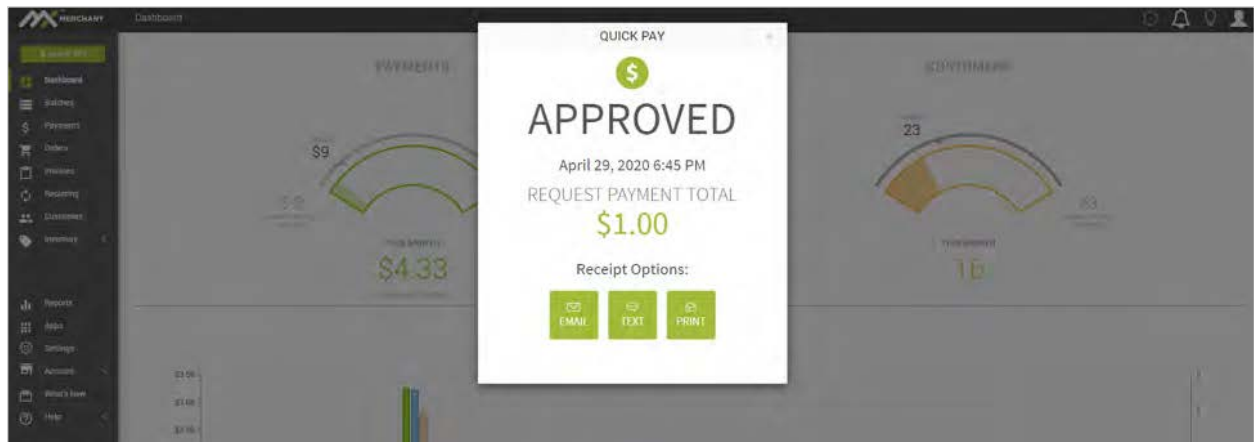

Merchant will enter an amount and select **Request Payment**.  
The CloudBridge App will display the **requested amount**.

Once card has been entered and IF the transaction is approved,  
the CloudBridge App will display as **approved**.

## Running a Transaction *(cont.)*

MX™ Merchant will also display an **approved** screen with receipt options.
