

ADVANTAGE SURCHARGE

Offset the Cost of Processing Fees for Credit Cards.

Priority's proprietary application, **MX™ Advantage for Surcharging**, provides merchants with the ability to apply a payment card surcharge—also known as a checkout fee—which is an additional fee a merchant adds to a customer's bill when a credit card is used for payment. MX™ Advantage for Surcharging helps merchants offset the cost of processing fees for credit cards and adds a new revenue stream for your business.

Use MX™ Advantage for Surcharging via a virtual terminal with MX™ Quick Pay, or pair it with the Dejavo Z series, which is fully integrated with the MX™ Merchant. These offerings combined give you the tools needed to provide a surcharge countertop solution.

MX™ Advantage for Surcharging is integrated with the following Dejavo solutions:

- Z3 PIN Pad /Terminal
- Z6 PIN Pad /Terminal
- Z8 - Countertop
- Z9 - 3G/4G & WiFi
- Z9 - WiFi Only
- Z11 - Countertop
