

ADVANTAGE NON-CASH ADJUSTMENT

Lower the Cost of Processing Fees.

The costs associated with running a small business continues to increase and finding creative ways to recoup those costs can be challenging.

Priority's proprietary application, **MX™ Advantage for Non-cash Adjustment**, provides merchants with the ability to offset the cost of processing fees for credit and debit acceptance by applying a fee to all sales and applying a discount off the total sale amount for cash paying customers.

Utilize the virtual terminal, MX™ Quick Pay and a card reader, or pair MX™ Advantage for Non-cash Adjustment with the Dejavo Z series, to continue saving by obtaining swiped rates vs keyed.

The MX™ Advantage for Non-cash Adjustment is integrated with the following Dejavo solutions:

- Z3 PIN Pad / Terminal
- Z6 PIN Pad / Terminal
- Z8 - Countertop Ethernet & WiFi
- Z9 - 3G/4G & WiFi
- Z9 - WiFi Only
- Z11 - Countertop

And to add value and create customer loyalty, the MX™ Advantage for Non-cash Adjustment integrates seamlessly with these MX™ products:

- MX™ Invoice
- MX™ Payment Links
- MX™ QuickBooks Sync
